

Better Lights for Starry Nights

Learn how to save money, preserve our night skies and enjoy the stars!

Thursday • March 28th, 2013 • 7:00 pm (doors open at 6:30)

Event Center at Lyndon B. Johnson National Historic Park, Johnson City, TX

227 Settlement Road, just off Hwy 290 as you are heading west towards Fredericksburg

Fun, Free, Open to the Public

A dark night sky full of big bright stars is important here in the Hill Country, just like clean rivers, scenic vistas and natural landscapes. Little by little, light-by-light, the magical mystery of the big Texas night sky is diminishing. But it's not too late to reverse this trend. You can help!

- Bill Wren of the McDonald Observatory will share his expertise on the value of starry nights and simple strategies to protect the Texas night skies.
- Learn money saving tips - what you can do to "fix" wasteful outdoor lights at your home, ranch, neighborhood and community.
- Sports fields, commercial buildings and schools can be safely and effectively lit in ways that reduce light pollution – find out how.
- The charm of the Hill Country will be enhanced as our community works together to create starry nights for future generations.
- Learn more about protecting Starry Nights at www.HillCountryNightSkies.org
