

Better Lights for Starry Nights

Learn how to save money, preserve our night skies and enjoy the stars!

Thursday • March 28th, 2013 • 7:00 pm (doors open at 6:30)

Event Center at LBJ National Historical Park, Johnson City, Texas

Enter at the National Park sign on US Hwy 290, $\frac{3}{4}$ miles west of the US 290/US 281 intersection in Johnson City

Fun, Free, Open to the Public

A dark night sky full of big bright stars is important here in the Hill Country, just like clean rivers, scenic vistas and natural landscapes. Little by little, light-by-light, the magical mystery of the big Texas night sky is diminishing. But it's not too late to reverse this trend. You can help!

- Bill Wren of the McDonald Observatory will share his expertise on the value of starry nights and simple strategies to protect the Texas night skies.
- Learn money saving tips - what you can do to "fix" wasteful outdoor lights at your home, ranch, neighborhood and community.
- Sports fields, commercial buildings and schools can be safely and effectively lit in ways that reduce light pollution – find out how.
- The charm of the Hill Country will be enhanced as our community works together to create starry nights for future generations.
- Learn more about protecting Starry Nights at www.HillCountryNightSkies.org
