

Help Preserve Our Night Skies

Join Us...

*Learn how to save money, preserve our night skies
and enjoy some star gazing!*

March 29, 2012 • 7:30 pm
Texas Tech Center Cafeteria • Junction, TX

Fun, Free, Open to the Public, Kids Welcome

A Dark Night Sky full of big bright stars around Junction is important, just like our clean rivers that flow through the Hill Country. But little by little, light-by-light, the magical mystery of the big Texas night sky is getting dimmer and dimmer. We Need Your Help!

Hill County Alliance invites you to learn how to be Night Sky Friendly

- Learn Money Saving Tips - What you can do to "fix" wasteful outdoor lights
- Judge Andrew Murr will present benefits of the Kimble County voluntary "Night Skies Partnership" with Pedernales Electric Coop and other Night Sky Initiatives now underway
- Workshop on outdoor lights –a "How To" session with Bill Wren of McDonald Observatory near Fort Davis and Cindy Luongo Cassidy of Driftwood
- After Dark enjoy Guided Star Gazing on the Tech Center lawn; guide provided by San Antonio League of Sidewalk Astronomers – Bring a lawn chair or blanket

Bring telescope or simply join in the fun with other astronomers

Free "Preserving the Night Skies" informational brochure in the March 21st edition of *The Junction Eagle*.
