Special Session

Water Conservation:

Best Practice & New trends for
Central Texas Building projects

When Tuesday, May 01, 11:30am - 1:00pm

Where The Center for Architecture

Who Billy Kniffen, American Rainwater Catchment Systems Association
Calvin Finch, Ph.D. San Antonio Water System

What In anticipation of another hot, dry summer, we're planning a great session on water use reduction. We'll be discussing collection and conservation as well as the regulatory issues that go along with alternative technologies and systems applicable to your building projects. Register Now!

Billy Kniffen is a Texas AgriLife Extension Service Water Resource Specialist with focus on rainwater catchment education and with statewide responsibilities. He has served in extension for 29 years. He currently serves as ARCSA's vice-president and education committee co-coordinator. He helped organize the Texas Rainwater Catchment Association and served as its first president in 2007-09.

Calvin Finch, Ph.D., is the Director of Regional Initiatives and Special Programs for San Antonio Water System. He represents SAWS and coordinates activities in the Edwards Aquifer Recovery Implementation Program as well as helping to manage area groundwater conservation district relations and other regional ventures. Finch, holds a doctorate in horticulture from Texas A&M University, previously served as conservation director and water resources director at SAWS.

How Call AIA San Antonio to register: 210-226-4979
