

Master Naturalist Meeting

May 21, 2012

7:00 p.m.

Dragonflies: 300 Million Years of Predation

Bill Lindemann, Fredericksburg's own naturalist of renown, will speak to the chapter on May 21, 2012 at 7:00 p.m. on the topic of dragonflies.

The presentation will cover the physiology, behavior, and life history of one of nature's most voracious predators - a natural design that has survived for 300 million years.

Dragonflies are predators throughout their larval and adult stages, using their swimming and flying skills to quell their insatiable appetites.

The presentation will also showcase the beautiful colors and designs of South Texas' common dragonflies and their close relative, damselflies.

Join us!

The meeting is free and open to the public. Everyone is welcome.

For more information, please call Tom Hynes at 830-990-5750.

Monday - May 21
7:00 p.m.
UGRA Lecture Hall.
