

Come Join Us for the Next Westcave Roundtable

Presenter:

Kelly Conrad Bender -Urban Wildlife Biologist, Central Texas, Texas Parks & Wildlife.
Author of Texas Wildscapes: Gardening for Wildlife

Topics:

Welcome to the Wild Country is a program designed to introduce people to the unique assemblage of wildlife and plants of the Texas Hill Country. We will look at what makes our ecology special, and whom you might hope to encounter on your wild excursions.

Texas Wildscapes was developed by Texas Parks and Wildlife in 1995 to assist Texans in creating landscapes that are both visually appealing and attractive to appropriate wildlife. The program emphasizes using native plants in landscaped beds to provide critical components of habitat: food and shelter. By providing the elements of habitat (food, shelter, and water) in their gardens, Texans can attract an exciting variety of birds, butterflies, frogs, and lizards and bring the beauty and vitality of nature home. This program will examine the elements of a habitat appropriate for a Wildscape, provide examples of garden-hardy native plants, and reveal tips for creating a successful Wildscape.

Date and Timing: Thursday May 23rd from 6-7:30pm

Cost: Free- please RSVP
