

Is a new building the most sustainable choice?

"...synonyms for "recycle" include "reprocess", "salvage", "recover", and "reuse"..."

On May 30th, **COTEcinema** presents:

THE GREENEST BUILDING

a Wagging Tale Productions film

Thanks to our sponsors!

FACILITY
Renew, Refresh, Repurpose

Guy Chipman Construction, L.P.

NEW VENUE!

"**The Greenest Building**," a new hour-long documentary by producer Jane Turville, presents a compelling overview of the important role building reuse plays in creating sustainable communities. Narrated by David Ogden Stiers, "**The Greenest Building**" explores the myth that a "green building" is a new building and demonstrates how renovation and adaptive reuse of existing structures fully achieves the sustainability movement's "triple bottom line" - *economic, social, and ecological balance*.
