

The Texas Riparian Association convenes at the San Antonio River

2010 Annual Meeting

Hosted by the San Antonio River Authority

September 17, 2010

Texas Riparian Association
c/o Center for Environmental Research
2210 S. FM 973
Austin, TX 78725-7103

Annual Meeting

Join the TRA for a full day of riparian talks culminating with a tour of the San Antonio River Improvements Project Mission Reach Phase 1, led by San Antonio River Authority Project Staff.

After our workshop and kayak trip on the South Llano River at Junction in March, and the Riparian Field Day on the O2 Ranch in the Trans Pecos in May, this year's Annual Meeting in partnership with the San Antonio River Authority focuses on riparian issues in the urban context of San Antonio.

This meeting offers participants insight into how scientific understanding of local riparian ecosystems, fluvial geomorphology, hydraulic engineering and mitigation banking policy is being applied in restoring natural riparian processes and habitats, and reconnecting cultural and historical features to enhance recreation and enjoyment.

The mission of the Texas Riparian Association is to encourage healthy riparian systems as essential to the quality of life in Texas through the exchange of knowledge and expertise, and the dissemination of information.

Meet us at the San Antonio River and become part of the TRA educational process!
