

SPRING LAKE

NUTRIENT & WATER QUALITY PRESENTATION

Thursday, December 13th

7:00–9:00pm

City Park Rec Hall
170 Charles Austin Drive

Spring Lake is an ecologically sensitive body of water which feeds the San Marcos River. The Meadows Center for Water and the Environment conducted a study to analyze water quality and nutrient inputs to the lake. Please join us for a presentation of the results. This information will contribute to the upcoming Watershed Protection Plan for the Upper San Marcos River.

This event will include:

- A final presentation for the Spring Lake Nutrient and Water Quality Study
- An opportunity to weigh in and approve this project
- Refreshments will be provided
